TO: All HPHL Players & Parents

The High Performance Hockey League is committed to developing the participants in our hockey league both on and off the ice. When the HPHL was formed, one of the key factors we considered was how to develop a league that could balance the needs of our student athletes with the time requirements of the sport of hockey along with school. We recognize and value the importance of education as a key component to lifetime success and we want to encourage all of our student athletes to make academic success as much a priority as success on the ice.

To that end, the HPHL Board of Directors is pleased to announce the establishment of the HPHL Academic Excellence Program. Each year, the HPHL will recognize the academic achievements of our student athletes. Specific guidelines are attached and this program is open to all age groups in the HPHL. Details regarding specific requirements and the application process can be found on the HPHL website. We believe that rewarding academic excellence is as important as rewarding hockey excellence!

We hope that all of our players will strive to participate in this program. We will post reminders on the website when the application deadline is approaching. Until then, keep up the great study habits and continued best of luck both on and off the ice!

Sincerely,

HPHL Board of Directors
